

Bariatric

Both our 904 (mid-wheel drive) and 706 (front-wheel drive) power bases employ the custom heavy duty gearing system only possible using our unique chain drive transmission. We offer both bases in 500 lb. and 700 lb. weight limit packages with every bariatric base fully equipped with a specially reinforced bariatric rehab seat.

This is not just a bigger seat frame or a reinforced base; our experience has taught us that for these chairs all the parameters are different. Our Bariatric products extend beyond just standing up. We create chairs that help remove limitations.

904S BARIATRIC

SPECS

- 26" Base Width X 32" Length
- 12" x 4" Drive Wheels, 9" Casters
- Heavy Duty Front Suspension
- 500 lb or 700lb Weight Capacities
- 4-Pole Motor and Chain Drive
- HD Rehab Seat or Bariatric Seat Options

HIGHLIGHTS

The High-ratio Rear-wheel Drive configuration and compact frame coupled with our unique Bariatric Drive-Train make this version of our 904S singularly suited to balance increased weight demands and overall performance. The 904S Bariatric proves you don't have to compromise mobility to achieve durability.

706 BARIATRIC

SPECS

- 26" Base Width X 36" Length
- 12"x 4" Drive Wheels, 9" Casters
- 700 lb Weight Capacity
- 4-Pole Motor and Chain Drive
- 5 mph Top Speed
- Growable Bariatric Seat

HIGHLIGHTS

The activated Drive-Wheel position of our Front-Wheel Drive 706 provide unparalleled traction and control for the most demanding users. With custom Bariatric Seating Options available, such as Rear Easement Allowance and Custom Sized Reinforced Footplates, the 706 mitigates the challenges of heavily front-loaded seating postures.
